

ABDULJAHHA PARCHURU

AI Engineer | Gen AI Developer | Python Fullstack Developer
Hyderabad, India | +91 9100845631 | parchuruabduljaha786@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

AI Engineer and Gen AI Developer with hands-on experience building LLM-powered applications, RAG pipelines, and full-stack solutions using Python, Django, and FastAPI. Skilled in API integration, prompt engineering, and conversation design with tools such as Claude, Gemini, and OpenAI, with a strong foundation in ML/DL using Scikit-learn, TensorFlow, and Keras. Passionate about building intelligent, real-world AI solutions.

TECHNICAL SKILLS

AI / Gen AI: LLM APIs (Claude, Gemini, OpenAI), LangChain, Prompt Engineering, RAG, Transformers
ML / DL: Supervised & unsupervised learning, neural networks, computer vision (Scikit-learn, TensorFlow, Keras, OpenCV)
Python Fullstack: Python, Django, FastAPI, HTML, CSS, REST APIs
Database: MySQL
Cloud & Tools: AWS, Git, Jupyter Notebook, VS Code, Vibe Coding, Antigravity, Gemini

INTERNSHIP

- AI & Gen AI Developer Intern, Talent Smart Soft Solutions** *May 2026 - Nov 2026 (Ongoing)*
- Building and integrating Large Language Models (LLMs) through API integration, prompt engineering, and conversation design for real-time applications.
 - Developing RAG pipelines using vector databases and embedding models; working on transformer-based models for NLP tasks such as summarization and classification.
 - Contributing to live production GenAI projects using Python, Django, and FastAPI in an agile team environment.

PROJECTS

- Face Recognition Attendance System** *Deep Learning | FastAPI | MySQL | OpenCV | ONNX*
- Developed a real-time face recognition attendance system using deep learning models via ONNX runtime and OpenCV, with a FastAPI backend for enrollment, live recognition, and automatic attendance logging into MySQL.
- AI Ticket Classification System** *Python | NLP | Prompt Engineering*
- Built an AI-based customer support automation tool that uses NLP and prompt engineering to intelligently group and classify incoming support tickets, streamlining triage and reducing manual effort.
- Biometric Web Authentication System** *Python | Web Security | Biometric Verification*
- Designed a web-based biometric authentication system enabling secure, password-less user login through biometric verification, focused on strengthening access control for web applications.
- Machine Learning & Deep Learning Projects** *Python | Scikit-learn | TensorFlow | Keras | Jupyter Notebook*
- Built and trained ML/DL models for classification, regression, clustering, and image/text data, managing complete workflows from preprocessing to evaluation and visualization.

EDUCATION

- B.Tech in Computer Science & Engineering, Malineni Perumallu Educational Society's Group of Institutions, Guntur** *Nov 2021 - Jun 2025*
CGPA: 7.5
- Intermediate (M.P.C), Narayana Junior College, Guntur** *Jun 2018 - Mar 2020*
CGPA: 8.34
- SSC, Narayana Group of Schools** *Jun 2017 - Apr 2018*
CGPA: 9.7

CERTIFICATIONS

- Certified in Python by FreeCodeCamp
- Certificate of Internship by The Developers Arena
- Certified by Smart Internz on Front-End Development
- Certified by Cognitive Class on Python for Data Science
